

MADE TO LAST PURGE PLUG KITS

Created from a high temp, high performance Duravar-Ultra High Molecular Polyethylene, with an aluminum 1" purge plug and exhaust, our purge plugs dramatically reduce the argon usage. They make the purge process instantaneous, creating the perfect weld environment within minutes instead of hours.

Just push it in, hit the gas, and begin to weld! With its high temperature dual silicon rings, you're sure to get the perfect seal every time. Available in yellow, blue, orange, or black.
